Silicone Rechargeable spatula skin scrubber ultrasonic peeling beauty machine

Diamond dermabrasion is an advanced skincare technique that utilizes a patented diamond dermabrasion tube, featuring diamond particles of varying thickness on its carved heads. By gently rubbing the skin back and forth while controlling the intensity of suction vacuum, it effectively exfoliates the skin's outermost layer, providing a non-invasive and shallow dermabrasion experience.

Diamond Peel Exfoliation Tips for Precision Angle Microdermabrasion

Big -Strong suction for large area, stubborn blackhead, acne

Small -Cleansing pore Weaker suction, use for sensitive skin

Oval-Irregular area Use for corner,nose

Stubborn area For acne, knee, elbow areas, striae of pregnancy

for face,scars,fine lines and imperfections

Irregular area For mouth corner,oil area, wrinkles
